

# YOUR NEW KITCHEN

## YOUR GUIDE TO THE WORKS

This is the general guide to works taking place however this is subject to change. If there are any delays, your Customer Liaison Officer will keep you informed.

# A GUIDE TO YOUR NEW KITCHEN

## STEP 1

Our electrician will attend and lock of the electrics in your kitchen.

Our team will then remove your old kitchen. Once this is complete your kitchen will be noticeably empty, with only a temporary sink remaining.

## STEP 2

Our electrician will return and carry out the first stage of the electrical rewire.

this is referred to as the 1st fix.

## STEP 3

Upon the completion of the electrical work, our plasterer will proceed to carry out any necessary plastering according to the specification.

## STEP 4

Once the plaster has fully dried, our kitchen fitter/joiner will arrive to install your new kitchen.

Additionally, they will take care of any other related joinery tasks as required.

## STEP 5

Our electrician will revisit to carry out the second phase of electrical work, which involves installing any new sockets and lights as required.

This is referred to as the 2nd fix.

## STEP 6

Our decorator will come in to paint the kitchen walls, ceiling, skirting boards, and the kitchen side of the internal door.

## STEP 7

Our floor layer will arrive to install the new flooring for your kitchen.

## STEP 8

Upon completion, our finisher will be call to seal, tidy up, and address any finishing touches necessary.

Once we ensure all work meets your satisfaction, our Site Manager will conduct a thorough handover inspection.

## To ensure proper preparation:

1. Empty all items from your kitchen cupboards.
2. Remove blinds, pictures, and any other fixtures.
3. If assistance is required, please contact your CLO
4. Ensure all white goods are taken out of the work area. If you are unable to do this yourself, our team can provide assistance.

## Important reminders:

1. You will have limited access to your kitchen during the work.
2. If you need alternative cooking facilities, please reach out to our CLO for assistance.
3. Consider setting up a designated food preparation area in another room where you can temporarily relocate essential items like the microwave and kettle.
