

Aftercare - Bathroom

We hope you're happy with your new bathroom and we would like to thank you for your patience and co-operation whilst we have been working in your home. We hope that you find this guide helpful and useful.

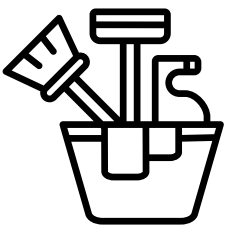

Fortem provides a 12-month warranty for the work completed in your home. If you encounter any issues within this period, please inform your landlord, who will relay your concerns to us. We will then contact you to arrange a convenient appointment.

General maintenance:

- Always use an extractor fan or open a window after bathing or showering to prevent excess moisture buildup and reduce the risk of mold and mildew.
- Wipe down surfaces frequently with a soft cloth and mild detergent to prevent stains and soap scum buildup.
- Stay away from abrasive cleaners, bleach, or ammonia-based products, as these can damage finishes and surfaces.

General maintenance:

- Quickly clean up any water spills on the floor to prevent slipping and damage to flooring materials.
- Place non-slip mats in wet areas to enhance safety and protect flooring.
- Wipe down cabinet surfaces regularly and ensure they are kept dry to prevent warping or swelling.

Extractor fan – The fan runs continuously and features a sensor that detects moisture in the air. When moisture levels rise, the boost function will automatically activate to clear it. The pull switch allows for manual activation of the boost if needed, though this is rarely necessary. Please avoid using the isolation switch to turn the fan on and off. This switch is primarily to isolate the fan for maintenance.

Thanks - The Fortem Capital & Retrofit team
